

Meet the Challenges of Tomorrow With a UW Master's *in* Physics

The University of Washington Master of Science in Physics program provides the breadth of education you need to handle the complex challenges arising every day as science and technology advance.

Study the theory and applications of electromagnetic and quantum physics in the University of Washington Master of Science in Physics program. Designed for working professionals and recent graduates, this program offers evening classes that fit into your busy schedule. Learn fundamental principles and methods and work directly with the same full-time faculty who teach on campus. Customize the program to fit your professional goals through a variety of electives and an independent study project.

Explore Your Options

This program is especially designed for full-time employed students who have an undergraduate degree (or equivalent preparation) in physical sciences, engineering, mathematics or computer science. The program offers many courses to suit your professional needs:

- Basic graduate-level courses for returning students
- Special content courses for science teachers
- Technical courses for working scientists and engineers

You can begin the Master of Science in Physics program any quarter. If you are unsure about taking the full program, you have the option of taking individual courses offered on a graduate nonmatriculated (GNM) basis with permission of the program coordinator.

Evening courses, which meet two nights per week, may be taken either individually or as a course of study leading to a Master of Science in Physics. Students typically complete the requirements in three years by enrolling in one late afternoon or evening class each quarter of the academic year.

Start Any Quarter

You can apply for admission at any time during the academic year or summer. Prospective students submitting applications before these deadlines will be able to begin classes in the quarter immediately following.

Application deadlines are listed below.

Fall Quarter: **September 1**

Winter Quarter: **November 1**

Spring Quarter: **February 1**

Summer Quarter: **May 15**
